

# Reshav Abraham

## Full Stack ML Engineer

### about me

I am a passionate software engineer interested in Full stack development and machine learning. I have experience building backend API's and Frontends. I also have experience in training and serving machine learning models.

🏠 160 Vroom Street, Jersey City

## Work Experience

### Nlmatix

#### NLP Engineer

New York, NY — October 2019 - April 2021

- \* Improved text indexing from PDF documents to enhance search retrieval quality.
- \* Designed back-end APIs with Python and Swagger.
- \* Built out front-end features with React and ANT design.
- \* Lead on-prem installation for clients and deploying on restrictive environments.
- \* Maintained and debugged CI/CD pipelines, with Docker and Kubernetes.

### Dell EMC

#### Software Intern

Charlotte, NC — May 2017 — August 2017

- \* Optimized memory usage for enterprise data pipelining software by modeling a regression on real-time memory consumption data using Apache Spark.

## Certificates

### Natural Language Processing with Deep Learning

CS224N, Stanford University, October 2020 — December 2020

## Projects

## Technical Skills

**Programming** Python, JS, Docker, Kubernetes

**Frameworks** Pytorch, Tensorflow, Swagger, React

**Coud** GCP, Azure

**Databases** MongoDB, Postgress, Redis

**Markup**  $\LaTeX$ , HTML, CSS

## Education

### B.S Computer Engineering

#### Purdue University

West Lafayette, IN — 2014 — 2018

#### Multi-core Processor System Verilog

- \* Implemented a synthesizable multi-core processor for processing MIPS assembly language in SystemVerilog.
