Work Experience

Nlmatix

NLP Engineer

New York, NY — October 2019 - April 2021

- * Improved text indexing from PDF documents to enhance search retrieval quality.
- * Designed back-end APIs with Python and Swagger.
- * Built out front-end features in React and ANT design.
- * Lead on-prem installation for clients and deploying on restrictive environments.
- * Maintained and debugged CI/CD pipelines, with Docker and Kubernetes.

Dell EMC

Software Intern

Charlotte, NC — May 2017 — August 2017

- * Optimized memory usage for enterprise data pipelining software by modeling a regression on real-time memory consumption data using Apache Spark.

Certificates

Natural Language Processing with
Deep Learning

Projects

Technical Skills

Programming Python, JS, Docker, Kubernetes

Frameworks Pytorch, Tensorflow, Swagger, React

Coud GCP, Azure

Markup L^AT_EX, HTML, CSS

Education

B.S Computer Engineering
Purdue University

West Lafayette, IN — 2014 — 2018
