Reshav Abraham

Full Stack ML Engineer

about me

I am a passionate software engineer interested in Full stack development and machine learning. I have experience building backend API's, training and serving machine learning models, and building frontends

Work Experience

Nlmatics

NLP Engineer

New York, NY — October 2019 - April 2021

- * Improved text indexing from PDF documents to enhance search retrieval quality.
- * Designed back-end APIs with Python and Swagger.
- * Built out front-end features in React and ANT design.
- Lead on-prem installation for clients and deploying on restrictive environments.
- * Maintained and debugged CI/CD pipelines, with Docker and Kubernetes.

Dell EMC

Software Intern

Charlotte, NC — May 2017 — August 2017

* Optimized memory usage for enterprise data pipelining software by modeling a regression on real-time memory consumption data using Apache Spark.

Certificates

Natural Language Processing with Deep Learning

Projects
